

God bless US

English version by Abhi Dattasharma (2011-01)

Our power imposes the duty on us
To bring peace to this world
[and] Freedom and hope
To destroy the filthy animal

Against all tyrannies
We raise the cross of God
Faith and democracy
We will make humankind happy

(Refrain)

God bless us for we are the Good
In God we trust we escaped the Flood
God bless us for we are the Best
In God we trust for we are US

We were chosen
To guide humanity
To go to every country
To teach the Truth

We know what is good
We know what you need
Because we are right
You will understand it soon

The jealousies do not matter
And [neither] the hatred that some throw at us
Because the enemy's weapons
Are not as strong as ours.

We will crush under the bombs
The countries which are sources of evil
Wherever our hands fall
Our ideal will flourish.

We baptize with blessed water
Our bombs and our ammunition
So that those which benefit from it
May meet the redemption

The inevitable victims
Of the collateral damage
Will have the incredible chance
To join the Almighty

The disappearances do not matter
Of forests and animals
Thanks to science fiction films
We can create something more beautiful

The destruction does not matter
Of distant countries
Earth is disposable
We are the blessed people

The support of God ensures
Our walk in triumph
Towards a better and sure world
We will go till the stars
